Ideation Phase
Brainstorm & Idea Prioritization Template

Date	26 February 2026
Team ID	MCA_DA2
Project Name	Plugging into the Future: An Exploration of Electricity Consumption Patterns
Maximum Marks	4 Marks

Step 1 — Team Gathering & Problem Statement

Team Members

Divyansh Singhal (Lead), Faisal Khan, Ishita Prajapati, Kali Bakshi

Session Goal

Analyse India's electricity consumption (2019–2020) and show the COVID-19 lockdown impact using an interactive Tableau dashboard embedded in a Flask web app.

Problem Statement (HMW)

How might we build an interactive dashboard so that energy analysts can compare electricity usage across 33 Indian states — before, during, and after the COVID-19 lockdown — without using Excel?

Rules: Stay on topic • No judgment • Go for volume • Be visual

Step 2 — Brainstorm & Idea Grouping

Theme	Ideas from the Team
Data Engineering	Load CSV to MySQL | Validate nulls with Python | SQL CASE WHEN for lockdown phases | Index on Dates & Regions
Tableau BI	Connect Tableau to MySQL | Calculated fields: Month, Year, Quarter, Phase | Top N parameter slider
Visualisations	India state map | 2019 vs 2020 line chart | Region stacked bar | Before/After lockdown bar | Quarter chart
Dashboards & Story	3 Dashboards with filters | 8-scene Tableau Story | Publish to Tableau Public

Step 3 — Idea Prioritization

Idea	Importance	Feasibility	Decision	Sprint
Load CSV to MySQL + Python validation	High	High	✓ Selected	Sprint 1
Tableau–MySQL connection + calculated fields	High	High	✓ Selected	Sprint 2
12+ Tableau visualisations	High	High	✓ Selected	Sprint 2–4
3 Dashboards with interactive filters	High	High	✓ Selected	Sprint 5
Tableau Story (5 scenes)	High	High	✓ Selected	Sprint 5
Tableau Public publishing	High	High	✓ Selected	Sprint 6
Flask web app with iframe embed	High	High	✓ Selected	Sprint 6
India choropleth map	High	Medium	✓ Selected	Sprint 4
Real-time POSOCO API	Low	Low	✗ Deferred	Future
ML demand forecasting	Low	Low	✗ Deferred	Future
