Ideation Phase
Empathize & Discover — Empathy Map Canvas

Date	28 February 2026
Team ID	MCA_DA2
Project Name	Plugging into the Future: An Exploration of Electricity Consumption Patterns
Maximum Marks	4 Marks

User Persona:

Arjun Mehta — Senior Energy Data Analyst at a State Electricity Board. 5 years experience. Needs to brief officials on electricity trends weekly. Comfortable with Excel but limited BI tool exposure.

THINK & FEEL

Worried about presenting wrong data. Concerned India's NE region is ignored in policy. Aspirations to become the team's go-to data expert. Thinks — 'If only I had a dashboard, I could answer questions live.'

HEAR

- Boss says: 'Why does a chart take 3 hours?'
- Peers: 'Tableau is industry standard now'
- News: 'Power demand collapsed 40% in lockdown'
- Team lead: 'Send a URL, not a screenshot'

SEE

- Colleagues using Power BI and Tableau daily
- POSOCO PDFs — rich data but no interactivity
- News infographics on COVID recovery — wants same
- Officials deciding from 2019 Excel snapshots

SAY & DO

Says in meetings: 'Let me pull up the chart' — then fumbles with Excel. Rebuilds the same pivot tables every week. Shares PNG screenshots via WhatsApp. Manually splits the CSV to compare lockdown periods.

PAIN

- Rebuilds charts from scratch every week
- No filter for lockdown phase — manual split
- Cannot share live charts — only static PNGs

GAIN

- One dashboard with all 33 states and 5 filters
- Pre/During/Post lockdown at one click
- Shareable Tableau Public URL — no attachments

• Top N ranking requires manual sort each time • 16,600 row CSV crashes Excel sometimes	• Dynamic Top N slider — instant rankings • Story mode for non-technical leadership
