Requirement Analysis
Customer Journey Map

Date	01 March 2026
Team ID	MCA_DA2
Project Name	Plugging into the Future: An Exploration of Electricity Consumption Patterns
Maximum Marks	4 Marks

Persona: Arjun Mehta — Energy Data Analyst

Scenario: Analysing India's electricity consumption during COVID-19 lockdown using our Tableau

Stage	Actions	Touchpoints	Positive	Negative	Opportunity
Entice (Awareness)	Gets Tableau Public URL from a colleague in a Teams message	Email, Teams, LinkedIn	Excited to see India electricity data in an interactive format	No preview of what the dashboard covers	Add dataset summary on homepage (33 states, 2019–2020)
Enter (Access)	Opens Flask web app in browser. Views homepage. Clicks Dashboard tab.	Browser, Flask web app, Navbar	Relieved — no software installation needed, just a URL	Tableau embed takes 3–5 sec to load	Show loading message while Tableau iframe loads
Engage (Use)	Filters by state, region, year, lockdown phase. Uses Top N slider. Views 2019 vs 2020 trend line.	Tableau filters, Story navigation, India map	Spots June 2020 collapse instantly. Top N filter is effortless.	State abbreviations (HP, DNH, Pondy) are confusing	Add full state name in tooltips and a legend
Exit (Insights)	Notes key finding: June 2020 = 15,661 MU (lowest). Shares Tableau URL with team.	Tableau Story, Tableau Public URL, Email	Story mode explains findings clearly for non-technical officials	No single-click PDF export of all charts	Add Download Report button in Flask (future scope)
Extend (Share)	Shares URL in weekly ministry report. Returns to dashboard next week. Recommends to colleagues.	Email, PowerPoint, Tableau Public bookmark	Saves 2+ hours/week. Becomes the team's data expert.	Cannot bookmark a specific filtered view	Tableau URL parameter filter persistence (future scope)
